Profile

Third-year Industrial Information Technology undergraduate at Uva Wellassa University seeking a UI/UX Design internship. I have designed three projects end to end, covering user research, wireframes, high-fidelity UI and interactive prototypes in Figma, including a 15-participant research study for an emergency-response app. I turn user problems into clear, accessible interfaces, and I am available for [full-time / part-time] internship from [month, year] for [duration].

Tools

Design and prototyping: Figma, Sketch, Miro

Research and testing: User interviews, surveys, usability testing, user flows, personas

Web: HTML, CSS, JavaScript, React

Other: Responsive design, accessibility (WCAG basics), design systems

Projects

SafeGuard – Smart Emergency Response App | UI/UX Designer | Pixel Perfect Event, 2026 | [Case study link]

- Interviewed 15 participants to find the main pain points people face during emergencies, and used the findings to decide which features come first.
- Created wireframes and user journeys for the core flows (e.g. [sending an alert, contacting help]), then built a high-fidelity interactive prototype in Figma.

MS Club UWU – Club Landing Page | UI/UX Designer and Web Developer | Campus Project, 2026 | [Live site / case study link]

- Restructured the information hierarchy so events and sign-up actions are easier to find, improving navigation and engagement with event listings.
- Added member testimonials and designed a responsive, accessible layout for mobile and desktop.

Expenses App – Mobile Application Design | UI/UX Designer | Company Work Application, 2026 | [Case study link]

- Designed and prototyped a mobile expense tracker with category-based organisation so users can review spending quickly.
- Designed interactive charts that turn spending data into clear visual summaries.

Education

BSc (Hons) in Industrial Information Technology, Uva Wellassa University of Sri Lanka | August 2024 – Present Relevant modules: [list 3–4, e.g. Human-Computer Interaction, Web Development, Software Engineering]

Certifications

IBM – Applying UI/UX Design in the Real World (Capstone Project), Coursera, 2026
